Summary

Frontend Developer with 1.5+ years of professional experience delivering modern web applications and digital products. Currently working at Archiveads and leading the development of the Litun ecosystem. Skilled in Vue.js, Nuxt.js, Tailwind CSS, responsive design, SEO, SSR, performance optimization, and component-based architecture. Focused on building scalable, maintainable, and user-centered interfaces that combine clean code, strong performance, and exceptional user experience.

Experience

Frontend Developer, Archiveads – Mashhad, Iran

June 2025 – present

- Developed and maintained corporate and e-commerce websites using Nuxt.js, Vue.js, Tailwind CSS, and Headless WordPress.
- Built and customized reusable frontend components with a strong focus on scalability, maintainability, and performance.
- Worked on an internal Nuxt Layer architecture to accelerate website development through reusable templates, layouts, and shared components.
- Implemented SSR, SEO optimization, responsive design, and performance improvements across multiple projects.
- Developed custom WordPress themes and integrated frontend applications with CMS APIs.
- Managed website deployment on VPS and shared hosting environments.
- Assisted with server administration, deployment workflows, Nginx configuration, and infrastructure maintenance.
- Collaborated with designers and developers in an agile environment to deliver production-ready solutions.
- Contributed to the successful delivery of 15+ commercial websites and web applications.

Projects
